SECTION 01: PRODUCT AND COMPANY IDENTIFICATION

Product name: Lithium Tetraborate/Lithium Metaborate/Lithium Bromide
Formula: \( \text{Li}_2\text{B}_4\text{O}_7/\text{LiBO}_2/\text{LiBr} \)
Chemical family: Borate flux
Product use: For laboratory use only

Manufacturer: CLAISSE
Address: 350, FRANQUET, QUEBEC, QUEBEC G1P 4P3, CANADA
Phone: 1 418 656-6453
Fax: 1 418 656-1169

Emergency telephone number:
CANUTEC: +1 613 996-6666

SECTION 02: HAZARDS IDENTIFICATION

GHS and (EC) No 1272/2008 classification
Acute toxicity, oral (Category 4)
Skin corrosion/irritation (Category 2)
Serious eye damage/irritation (Category 2A)
Skin sensitisation (Category 1)

Label elements:
Pictograms:

![Pictogram]

Signal word: Warning (GHS07)

Hazard statements:
H315 Causes skin irritation.
H317 May cause allergic skin reaction.
H319 Causes serious eye irritation.
H335 May cause respiratory irritation.

Precautionary statements:
P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
P264 Wash hands thoroughly after handling.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P301+P312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
P302+P352 IF ON SKIN: Wash with plenty of soap and water.
P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Other hazards
No data available.

SECTION 04: FIRST AID MEASURES

Description of first aid measures

**General information**
Seek immediate medical advice. Take affected persons out of danger area and lay down.

**After inhalation**
In case of unconsciousness, place patient stably in side position for transportation. Supply fresh air. If required, provide artificial respiration. Keep patient warm. If symptoms persist, consult a physician.

**After skin contact**
Immediately wash with water and soap and rinse thoroughly. If skin irritation persists, consult a physician.

**After eye contact**
Rinse opened eye thoroughly with plenty of water for at least 15 minutes and consult a physician.

**After swallowing**
Rinse out mouth and then drink plenty of water. Do not induce vomiting. If symptoms persist, consult a physician.

**Most important symptoms and effects, both acute and delayed**
Symptoms: Headache, nausea, lowered blood pressure, gastrointestinal disturbance. Risks: Irritant effects and components of the product cause formation of methaemoglobin.

**Indication of any immediate medical attention and special treatment needed**
Treatment: Treat symptomatically and specialist advice physicians should contact the Poisons Information Service.
SECTION 05: FIRE FIGHTING MEASURES

Suitable extinguishing media
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media
No data available.

Special protective equipment for fire fighters
Wear self-contained breathing apparatus for fire fighting if necessary.

Hazardous combustion products
Hazardous decomposition products formed under fire conditions – borate/boron oxides and lithium oxides.

SECTION 06: ACCIDENTAL RELEASE MEASURES

Personal precautions
Use personal protective equipment. Avoid dust formation. Avoid breathing vapours, fumes or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

Environmental precautions
Avoid dispersal of spilled material, runoff and contact with soil waterways, drains and sewers.

Methods and materials for containment and cleaning up
Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed and non-leaking containers for local chemical disposal.

Reference to other sections
See Section 7 for information on safe handling.
See Section 8 for information on personal protective equipment.
See Section 13 for disposal information.

SECTION 07: HANDLING AND STORAGE

Precautions for safe handling
Provide suction extractors if dust is formed.
Do not inhale dust, smoke or mist.
Avoid contact with the eyes and skin.
Prevent formation of dust.
Prevent formation of aerosols.

Conditions for safe storage, including any incompatibilities
Requirements to be met by storerooms and receptacles: no special measures required.
Information about storage in one common storage facility: not required.
Further information about storage conditions: keep container tightly sealed; store receptacle in a well-ventilated area; store in dry conditions.

Specific end use(s)
No data available.
SECTION 08: EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters
These substances do not have occupational exposure limit values.

Personal protective equipment

General protective and hygienic measures
Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work shifts. Avoid contact with the eyes and skin.

Respiratory protection
For nuisance exposure, use type N95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection, use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection
Handle with gloves. The glove material has to be impermeable and resistant to the product, the substance or preparation. Selection of the glove material must be made considering the penetration times, rates of diffusion and degradation. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove’s outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Eye protection
Wear safety glasses with side shields conforming to EN 166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

Skin and body protection
Wear impervious clothing. The type of protective equipment must be selected according to the concentration and amount of dangerous substance at the specific workplace. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Specific engineering controls
Use mechanical exhaust or laboratory fume hood to avoid exposure.

Environmental exposure controls
No data available.

SECTION 09: PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Form: Powder
Colour: White
Safety data

pH: No data available
Melting point/freezing point: No data available
Initial boiling point/boiling range: No data available
Flash point: No data available
Flammability: No data available
Ignition point: No data available
Autoignition point: No data available
Lower flammable/explosive limit: No data available
Upper flammable/explosive limit: No data available
Vapour pressure: No data available
Relative density: No data available
Solubility: No data available
Partition coefficient n-octanol/water: No data available
Decomposition temperature: No data available
Viscosity: No data available
Relative vapour density: No data available
Odour: No data available
Odour threshold: No data available
Evaporation rate: No data available
Explosive properties: No data available
Oxidizing properties: No data available

SECTION 10: STABILITY AND REACTIVITY

Reactivity
No data available.

Chemical stability
Stable under recommended storage conditions.

Possibility of hazardous reactions
No dangerous reactions known.

Conditions to avoid
Avoid contact with reducing agents (HBr emanation). Avoid exposure to moisture.

Incompatible materials
Strong reducing agents.

Hazardous decomposition products
Hazardous decomposition products formed under fire conditions: borate/boron oxides and lithium oxides.

</tbody>
</table>

Skin corrosion/irritation
Based on OECD Guideline 404 (Acute Dermal Irritation / Corrosion) study, the lithium bromide was regarded to be irritant to the skin. No data available for lithium borates.

Serious eye damage/eye irritation
Based on OECD Guideline 405 (Acute Eye Irritation / Corrosion) study, lithium bromide solution showed severely irritating effects. No data available for lithium borates.

Respiratory or skin sensitization
Based on OECD Guideline 406 (Skin Sensitisation) study, the test substance lithium bromide was regarded to be sensitising to the skin. No data available for lithium borates

Germ cell mutagenicity (in vitro) – gene mutation
No data available.

Germ cell mutagenicity (in vivo) – DNA damage and/or repair
No data available.

Carcinogenicity
IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
ACGIH: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.

Reproductive toxicity
No data available.

STOT-SE (GHS)
No data available.

STOT-RE (GHS)
No data available.

Aspiration hazard
No data available.

Potential health effects
- Inhalation: May be harmful if inhaled. Causes respiratory tract irritation.
- Skin: May be harmful if absorbed through skin. Causes skin irritation.
- Eyes: Causes serious eye irritation.
- Ingestion: May be harmful if swallowed.
Signs and symptoms of exposure
Toxicity reported for borates in humans: ingestion or absorption may cause nausea, vomiting, diarrhea, abdominal cramps, and erythematous lesions on the skin and mucous membranes. Other symptoms include circulatory collapse, tachycardia, cyanosis, delirium, convulsions and coma. Death has been reported to occur in infants from less than 5 grams and in adults from 5 to 20 grams.

Large doses of lithium ion have caused dizziness and prostration and can cause kidney damage if sodium intake is limited. Dehydration, weight loss, dermatological effects and thyroid disturbances have been reported. Central nervous system effects that include slurred speech, blurred vision, sensory loss, ataxia and convulsions may occur. Diarrhea, vomiting and neuromuscular affects such as tremor, clonus and hyperactive reflexes may occur as a result of repeated exposure to lithium ion.

To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated.

Synergistic effects
No data available.

Persistence and degradability
No data available.

Bioaccumulative potential
No data available.

Mobility in soil
Water hazard class 1 (German regulation, self-assessment): slightly hazardous for water. Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

PBT and vPvB assessment
PBT: Not applicable.  
vPvB: Not applicable.

Other adverse effects
Will affect drinking water supplies. The product components are not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have harmful or damaging effects on the environment.
SECTION 13: DISPOSAL CONSIDERATIONS

Product disposal
The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional and local authority requirements. Contact a licensed professional waste disposal service to dispose of this material.

Contaminated Packaging Disposal
Dispose as an unused product.

Waste treatment-relevant information
Disposal of this product, solutions and any by-products should at all times comply with the requirements of the environmental protection and waste disposal legislation and any regional and local authority requirements.

Sewage disposal-relevant information
Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains and sewers.

Other disposal recommendations
Contact a licensed professional waste disposal service to dispose of this material.

SECTION 15: REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture
This safety data sheet complies with the requirements of regulation GHS and (EC) No 1272/2008 classification.

Chemical safety assessment
A chemical safety assessment has not been carried out.

DSL status
All components of this product are on the Canadian DSL list.

Emergency overview
Target organs: Central nervous system, kidney, blood, testes, thyroid, eyes and skin.

WHMIS classification
Not regulated.

HMIS classification
Health hazard: 2
Chronic health hazard: *
Flammability: 0
Physical hazards: 0
