

## **EPSILON XFLOW**

Save additional €175.000/year by highly reproducible and low maintenance sulfur analysis compared to any other sulfur analyzer, with Epsilon Xflow.

- Reduce conflicts between lab and on-line results (ASTM D2622, ISO 13032), saving precious time for product release, reducing temporarily higher give-away and costly re-analysis: savings €100.000/year
- Quickly switch between process streams: savings € 50.000/year
- Reduce instrument- and calibration maintenance: savings €15.000/year and 5 days/year
- Reduce costly batch re-blending by faster on-line results: savings €10.000 per re-blend batch

\*Monetary savings are based on 400.000 bbl/day refining capacity and typical operating costs. No warrantees or guarantees are given.

# EASY ON-LINE PRODUCTION CONTROL OF LIQUID PROCESS STREAMS

Customized integration of the Epsilon Xflow into your production process guarantees results right from the start. Malvern Panalytical's specialists offer a complete solution for integration, including required sample conditioning systems, probes, fast loop pumps and more.

The Epsilon Xflow on-line liquid analyzer, is specifically designed for continuous elemental composition analysis of any liquid. The on-line solution provides real-time elemental insight in your processes, thereby leading to more efficient plant operations and reduced costs.

- Multi-element analyzer with low detection limits
- Monitor and control your processes via Plant Control System
- Chemical resistance for a wide range of liquids
- Designed according to ATEX requirements
- · Low maintenance
- · Excellent long-term repeatability

## WHY CHOOSE MALVERN PANALYTICAL?

Malvern Panalytical is a global leader in materials characterization, creating expert solutions for the challenges associated with maximizing productivity, developing better quality products and getting them to market faster. We provide superior, customer-focused solutions and services which deliver tangible economic impact through chemical, physical and structural analysis of materials.

## SUPPORT AND SERVICE

Malvern Panalytical helps you increase your laboratory's productivity and the return on your investment with our global training, service and support network.

Our worldwide team of specialists adds value to your business processes by ensuring applications expertise, rapid response and maximum instrument uptime.

- · Local and remote support
- · Full and flexible range of support agreements
- Validation support
- Onsite or classroom-based training courses
- e-Learning courses and web seminars
- · Sample and application consultancy
